Project Management Expansion: Bridges SI appoints Matt Flebbe, PMP, CTS, MCTS as Senior Project Manager

Herndon, Virginia, October 18, 2013 - Bridges SI is proud to announce the addition of Matt Flebbe, Senior Project Manager, to the team as of Friday, October 11, 2013. Mr. Flebbe has been a leader in the AV industry for nearly the last decade and has extensive experience developing Project Management Office (PMO) processes that have directly lead to increased efficiencies and effectiveness. His leadership skills and expertise will be leveraged by Bridges SI in an effort to improve on the team's ability to execute complex projects in a superior manner.

Mr. Flebbe is a highly regarded professional with an exceptional background and unique core competencies. He is PMP and Sig Sigma Green Belt Certified, and has demonstrated success managing projects for corporate, education, government, and houses of worship repeatedly throughout his career. Bridges SI is confident that he will fit seamlessly into the team dynamics and will emerge as a key component in helping shape the company's growth for many years to come.

Previously, he served as Senior Project Manager and PMO Manager, and was responsible for developing a custom Enterprise Project Management solution which refined the company's day-to-day processes resulting in improved efficiency, better quality, and effective portfolio management. He succeeded in the development of a PMO from scratch and led the establishment of a supportive environment that allowed employees to grow and provide imaginative solutions to complex client needs and requirements.

Bridges SI welcomes Mr. Flebbe to the team and is excited for everything that he will bring to the table. For more information, please contact info@bridges-si.com.

ABOUT BRIDGES SI

Bridges SI is a multi-faceted Veteran-owned audiovisual (AV) system integration firm headquartered in Herndon, Virginia. Specializing in the integration and continuing support of complex, multi-class AV systems, Bridges SI has been instrumental in facilitating the functional growth and technological expansion of facilities for both commercial and federal organizations locally, regionally and nationally.
